Electric spinning tables (normal or fluo)

Abstract painting technique on electric spinning tables is a remarkable way of creating colorful, unique compositions. What is this art form about? You pour paint on canvas placed on the flat, spinning table. Thanks to the controller with a two-step speed regulation, you put the canvas into circular motion - centrifugal force makes the colours spread freely, creating effective, dynamic patterns. Additionally, each workstation is equipped with a pendulum hanging above an electric table, which allows the creation of harmonic, symmetric shapes. Participants also have access to various tools, such as strainers, funnels, or rollers, which allow for even more creativity.

Manual spinning tables (normal or fluo)

Abstract painting technique on manual spinning tables is an amazing method, allowing the creation of breathtaking compositions of colors and shapes. What is this art form about? A canvas is placed on a flat, rotating table, and paint is poured onto it. By turning a manual crank, you set the table in motion, regulating the spinning speed yourself. Thanks to centrifugal force, paint spreads on canvas, forming unique, effective patterns. This method boosts creativity and allows the creation of special works of art, full of dynamics and intensive colours.

NORMAL OR FLUO SESSION?

Each attraction is available in either normal light or fluorescent light.

FLUO SESSION

It's a true sensory delight - the paint you use comes alive under ultraviolet light, creating surprising effects. You'll make unique paintings that shine in UV, giving art a completely new dimension. During FLUO SESSION, we turn off the lights, and ultraviolet lamps illuminate paint colours, creating an extraordinary show. Music playing in the background creates a unique experience. It's a moment when art turns into magic.

NORMAL SESSION

Full control over your work of art, which you take home! Painting in natural light allows intentional choice of colours, perfect for your composition. You can choose from 9 colours, but nothing is stopping you from experimenting and creating your own, unique shades. During a normal session, you can splatter, paint, or spin - without limits, let your imagination and creativity run wild!
